

Felt Poppy Instructions

To make a poppy from felt sheets

You will need:

- 1 felt sheet in red
- 1 felt sheet in green
- A black button or 1 felt sheet in black
- Needle and thread or Hot Glue Gun
- Templates (see above)

First, download and print the templates. Using the template, cut out three petals from the red felt sheet and cut out one or two leaves from the green felt sheet.

Lay out the petals. Take one petal and overlap it with another one so that all the petals fit nicely together.

Take some thread and stitch the petals together around the centre, with the same thread stitch one or both leaves onto the back of the poppy. Or use Hot glue gun instead of sewing. Next, take your button or some black felt (the size of a £1 coin works well) and stitch or glue it onto the centre of the poppy.
